1 Definitions

1.1 Accreditation

Third-party attestation related to a conformity assessment body conveying formal demonstration of its competence to carry out specific conformity assessment tasks

1.2 Accreditation body

Authoritative body that performs accreditation; here it is EIAC.

1.3 Accreditation body logo

Logo used by an accreditation body to identify itself

1.4 Accreditation symbol¹

Symbol issued by an accreditation body to be used by accredited conformity assessment bodies to indicate they are accredited.

1.5 Appeal

Request by a conformity assessment body for reconsideration of any adverse accreditation decision related to its desired accreditation status

1.6 Assessment

Process undertaken by an accreditation body to determine the competence of a conformity assessment body, based on standard(s) and/or other normative documents and for a defined scope of accreditation.

1.7 Conformity Assessment Body (CAB)

Body that performs conformity assessment activities and that can be the object of accreditation

1.8 Conformity Assessment Activity

Activity conducted by a conformity assessment body when assessing conformity, activities covered by accreditation include, but are not limited to: testing including medical, calibration, inspection, certification of management systems, persons, products, processes and services, provision of proficiency testing, production of reference materials, validation and verification.

1.9 Interested parties

Person or organization with a direct or indirect interest in accreditation.

Direct interest refers to the interest of those who undergo accreditation; indirect interest refers to the interests of those who use or rely on accredited conformity assessment bodies.

¹ The word symbol is used instead of Mark since “Mark” is to be reserved to indicate conformity of a product

Interested parties can include the accreditation body, conformity assessment bodies, their associations and their clients, industry services, trade associations, scheme owners, governmental regulatory bodies or other governmental services, or non-governmental organizations, including consumer organizations.

- 1.10 Accreditation decision
Decision on granting, maintaining, extending, reducing, suspending and withdrawing accreditation
- 1.11 Scope of accreditation
Specific conformity assessment activities for which accreditation (Clause 3.1) is sought or has been granted.
- 1.12 Granting accreditation
Awarding accreditation for a defined scope of accreditation
- 1.13 Maintaining accreditation
Confirming the continuance of accreditation for a defined scope
- 1.14 Extending accreditation
Adding conformity assessment activities to the scope of accreditation
- 1.15 Reducing accreditation
Cancelling part of the scope of accreditation
- 1.16 Suspending accreditation
Putting temporary restrictions in place for all or part of the scope of accreditation
- 1.17 Withdrawing accreditation
Cancelling accreditation for the full scope
- 1.18 Witnessing
Observation by the accreditation body of a conformity assessment body carrying out conformity assessment activities within its scope of accreditation
- 1.19 Accreditation scheme
Rules and processes relating to the accreditation of conformity assessment bodies to which the same requirements apply. Accreditation scheme requirements include, but are not limited to, ISO/IEC 17020, ISO/IEC 17021, ISO/IEC 17025, ISO/IEC 17024, ISO 17034, ISO/IEC 17043, ISO/IEC 17065, ISO 15189 and ISO 14065.
- 1.20 Accreditation process
Activities from application through to granting and maintenance of accreditation as defined by the accreditation scheme

- 1.21 Proficiency Testing Program (PTP)
Evaluation of the Conformity Assessment Body performance against pre-established criteria.
- 1.22 Inter-Laboratory Comparison (ILC)
Organization, implementation and evaluation of the results of measurement and testing of the same or similar test items/samples carried out by two or more than two laboratories in conformity with pre-determined conditions.
- 1.23 Measurement Audit
A practical test whereby a well-characterized and calibrated test item (artifact) is ~~send~~ sent to a single laboratory and the results are compare with a reference value.
- 1.24 Accreditation certificate
Formal document or a set of documents, stating that accreditation granted for the defined scope.

2 Scope

- 2.1 This document stipulates the general accreditation requirements for Conformity Assessment Bodies (CABs) need to fulfill in order to get accreditation under EIAC accreditation programs.

15.5.4 The CAB shall act as following in case of reduction:

- a) Stop all advertising promotions or publications of the fact of accreditation.

16 Subcontracted Test, Calibration Inspection or Certification

16.1 As per EIAC-RQ-GEN-002, EIAC allows the accredited CAB to include results of subcontracted work in its endorsed reports/certificates with the accreditation symbol subject to the following actions taken by the accredited CAB:

16.1.1 The CAB shall inform the client of its intention to subcontract any part of the testing/ calibration/ inspection or certification and seek their approval and,

16.1.2 The CAB shall take full responsibility for the subcontracted work with a disclaimer of what was subcontracted.

17 Notification of Change

- 17.1 The CAB shall inform EIAC, without delay, of significant changes relevant to its accreditation, in any aspect of its status or operation relating to:
- a) its legal, commercial, ownership or organizational status,
 - b) the organization, top management and key personnel,
 - c) resources and premises,
 - d) scope of accreditation, and
 - e) Other such matters that may affect the ability of the CAB to fulfill requirements for accreditation.
- 17.2 If the major or radical changes are related to CAB's management or documentation systems, the CAB must officially notify EIAC of such changes without any delay.
- 17.3 If the changes are related to CAB's relocates, CAB shall immediately notify EIAC and shall not use the EIAC-ILAC-MRA logo in its reports during the period of shifting until further notification is received by EIAC. The following documents shall be submitted to facilitate the process of witnessing the new location:
- Shifting Plan,
 - Equipment Transferring Plan & Procedure,
 - Last Service Certificate provided in the Old Location,
 - Fixed Equipment Calibration Certificate,
 - First Service Certificate provided in the New Location,
 - Shifting Risk Assessment & Consequences,
 - The new location (including a location map).
 - The updated trade license
- 17.4 The assigned Assessment Team will cover 100% of the CAB's affected scope as a result of relocation. The certificate will be updated to reflect the new location once the decision is made regarding the visit package.
- 17.5 If the surveillance or reassessment visit is not scheduled after the client completed the shifting plan, an extraordinary visit may be conducted. The decision to conduct an extraordinary visit will depend on EIAC's case manager, the CAB's readiness, and the assessors' availability.

18 Specific Requirements for Technical Competence

18.1 EIAC defines specific technical requirements for competence regarding personnel, equipment, test methods, quality control and reporting for each type of CAB within their respective requirements' documents; for example EIAC-RQ-LB-001: Accreditation Requirements of Food and Environmental Laboratories, EIAC-RQ-LB-002: Accreditation Requirements of Construction Materials & Geo-technical Investigation Testing Laboratories, EIAC-RQ-LB-003: Accreditation Requirements for Calibration Laboratories and EIAC-RQ-LB-004: Accreditation Requirements for Medical Field Testing.

18.2 EIAC defines the minimum amount of participation in proficiency testing schemes for its applicants and accredited laboratories in proficiency testing programs conducted by competent national or international PT Providers to be:

- One activity prior to gaining Accreditation to each major sub discipline of a laboratory's scope of application,
- One activity relating to each major sub discipline of a laboratory's scope of accreditation within 3 years, a plan of the 3 years cycle of PTP participation shall be available.

18.3 In case competent national or international PT Provider in specific field is not available, CAB is allowed to run Inter-Laboratory Comparison (ILC) or measurement audit. Justification is required along with successfully passed result. ILC providers shall be accredited by ILAC MRA Signatories in the requested test/ activity in the similar range and shall have better Measurement Uncertainty (MU)/ Calibration and Measurement Capability (CMC) comparing with the CAB itself.

See the table below for the areas in the accreditation scope which are necessary to demonstrate the competence of a laboratory for the main field of activities by PT prior to accreditation:

Major Sub Disciplines	Areas in the accreditation scope necessary for demonstrating the competence of a laboratory
General Testing	
Physical and Mechanical Testing of Materials other than food and beverages	One activity in any Physical and Mechanical testing.
Environmental or Chemical Testing of Materials other than food and beverages	One activity in any Chemical testing.
Biological or Microbiological Testing of Materials other than food and beverages	One activity in any Biological or Microbiological testing.
Testing of Food and Beverages/ Chemical Analysis	One activity in any Chemical testing.

Testing of Food and Beverages/ Microbiological Analysis	One activity in any Microbiological testing.
---	--

Major Sub Disciplines	Areas in the accreditation scope necessary for demonstrating the competence of a laboratory
Medical Testing	
Microbiological Analysis	One activity in Microbiology Analysis.
Pathology Analysis	One activity in Pathology Analysis.
Histocompatibility Analysis	One activity in Histocompatibility Analysis.
Immunohematology Analysis	One activity in Immunohematology Analysis.
Diagnostic Immunology Analysis	One activity in Diagnostic Immunology Analysis.
Clinical Cytogenetics Analysis	One activity in Clinical Cytogenetics Analysis.
Chemical Analysis	One activity in Chemistry Analysis.
Hematology Analysis	One activity in Hematology Analysis.
Radiobioassay Analysis	One activity in Radiobioassay Analysis.
Calibration	<p>One activity in any of the particular calibration fields such as:</p> <ul style="list-style-type: none"> • Force • Mass • Length • Pressure • Temperature • Electrical Measurements
